The Ciaga®v Story
For thousands of years, those who inhabit the remote reaches of the world have understood the value of highly nutritional fruits - ingredients that are familiar to us, as well as the exotic produce of faraway lands. Any of these fruits are a healthy addition to your diet. But the precise selection and combination of them can yield an outstanding range of nutrients. Nikken challenged a worldwide team of scientists and flavour experts to amplify the potency of these valuable foods and combine them in a nutritional supplement. The result is **Ciaga®v**. An unparalleled combination of the Maqui Berry from remote Patagonia, the Acai Berry native to Central and South America, Elderberry, Blackberry, Grape Seed Extract and Raspberry - Ciaga®v is an array of healthy phytonutrients

Only Ciaga®v provides this carefully chosen, balanced broad spectrum of ingredients in an organic formulation. No artificial flavours. No artificial colours. No preservatives. No chemicals. Certified organic — nutrition as nature intended.

Ciaga®v unique formulation
The foundation of Ciaga®v is the Organic Maqui-Acai fruit blend. Science has discovered that the Maqui Berry, Acai Berry and Grape Seed Extract have some of the highest ORAC (antioxidant) values of any fruit - giving Ciaga®v an ORAC rating of more than 1500 units per 30ml. The Maqui and Acai Berry fusion also has very high levels of phenols and anthocyanins which, combined with other berries and extracts, give the remarkable blend of nutrients that Ciaga®v affords.

The ORAC objective: Short for Oxygen Radical Absorbance Capacity - the ORAC is established by independent laboratory testing and analysis and attempts to quantify the total antioxidant capacity of a food.

Natural in every way
Ciaga®v is an all-natural, certified-organic by both the QAI and Soil Association, 100% juice drink with no added preservatives and a naturally sweet flavour. The organic, fresh foods in Ciaga®v are harvested at the peak of their growth cycle. No pesticides are used in the growing or processing. No sugar (only those naturally occuring from the natural ingredients), artificial colours or artificial flavours are added. Flash sterilizing and aseptic bottling allow Ciaga®v to be prepared without prolonged pasteurisation, to preserve the natural nutrients. Even the Ciaga®v container is healthy - for our planet. Ciaga®v bottles are made of an environmentally-friendly polymer that contains no bisphenol A or other potentially harmful chemicals and are easily recycled. Compared to glass, they require fewer resources to store and transport, for a smaller carbon footprint and reduced impact on natural resources.

Serve 30ml chilled. Refrigerate after opening and consume within 30 days.

Available on Autoship.

Pack of 2 x 946ml bottles (#2130)
